

Master of Philosophy (MPhil) and Doctor of Philosophy (PhD) Programs in Social Science

Curriculum for Master of Philosophy (MPhil) Program in Social Science

The Master of Philosophy (MPhil) degree is available to students, on a limited basis, in areas of special research interests in the social sciences. Students are accepted with major research interests in anthropology, China's economy, demography, geography, political science, Science, Technology and Society (STS), social psychology, and sociology. Prior to admission, students must possess a sufficient reading background in the proposed thesis research area. Students must also demonstrate the capacity to identify a worthy research topic supported by a critical review of relevant literature.

Program Requirements

Students are required to take a minimum of 15 credits of PG courses offered by the Division, of which 9 credits must be chosen from the following research methodology courses:

SOSC 5090	Statistics in Social Science
SOSC 5110	Social Research Methods
SOSC 5170	Systematic Methods in Qualitative Research
SOSC 5340	Quantitative Analysis in Social Science

Additional coursework may be required as a part of the research preparation. Students are also required to complete a thesis under the supervision of a faculty in the Division, and subsequently, present and defend the thesis before the Thesis Examination Committee. They are expected to work closely with their supervisors on an informal rather than formal classroom basis.

Curriculum for Doctor of Philosophy (PhD) Program in Social Science

The Doctor of Philosophy (PhD) program is composed of two fields. Each field includes a number of academic specializations:

- i) Political Economy covers the specializations politics, economics, regional geography, international relations, and Science, Technology and Society (STS).
- ii) Social Relations covers the specializations sociology, psychology, anthropology, and demography.

Students must choose one of the two fields as their major field of study before the end of their second regular term of study. They should also identify a supervisor in one of the specializations before the end of their third regular term of study, and prepare for the qualifying examination in this academic specialization under the guidance of the supervisor.

Program Requirements

Students are required to take 27 credits of coursework, of which 12 must be from:

SOSC 5090	Statistics in Social Science
SOSC 5110	Social Research Methods
SOSC 5170	Systematic Methods in Qualitative Research
SOSC 5340	Quantitative Analysis in Social Science

For the remaining 15 credits, at least 9 credits have to be taken as taught courses and 6 credits among courses designated by the PG Committee as relating to the students' major field of studies.

For students whose native language is not English, and do not have a TOEFL score of over 600 (paper-based total) or 250 (computer-based total) or 100 (internet-based total), or an IELTS score of 6 or above, or a B grade or above in the Hong Kong "Use of English Examination", are required to take a course on English writing offered by the Language Center.

PhD Qualifying Examination

Students have to pass a qualifying examination related to their specialization before the end of their fifth regular term of study in order to become doctoral candidates. Students who have been granted 9 or more transfer credits are required to pass the qualifying examination before the end of their third regular term of study.

The examination will be a four-hour written examination, comprising two questions in each of the three parts: a) social science methodologies; b) general theories; and c) research developments. The student will be required to answer one question in each of these three parts. The student's Thesis Supervision Committee composes the examination questions, and is also responsible for grading the examination. Students will be graded Excellent, Good, Pass or Fail. The qualifying examination can be retaken only once.

The PhD Thesis

a) PhD Thesis Supervision Committee

The PhD thesis is conducted under the supervision of a Thesis Supervision Committee composed of at least two faculty members, one of whom is designated as thesis supervisor and committee chair. At least one member of the Committee must have supervised at least one doctoral student who has completed a PhD degree. One member can be from outside the Division.

b) PhD Thesis Prospectus Defense

The PhD candidate should present and defend a thesis prospectus within one regular term after he has passed the qualifying examination. The thesis prospectus should be a substantial document in the neighborhood of 30 pages, which demonstrates a mastery of the literature on the subject, identifies a

significant intellectual problem, and lays out a plan for solving that problem. The prospectus must be given to the Thesis Supervision Committee at least two weeks before the scheduled date of the prospectus defense. The prospectus is defended during a two-hour discussion with members of the Thesis Supervision Committee. The Committee will either formally approve the prospectus, or specify required revisions to be made within a specified time period for final approval.

c) PhD Thesis Examination

A student submitting a thesis will need to defend it before the Thesis Examination Committee. Details on thesis examinations can be found in the *Handbook for Research Postgraduate Studies*.
